

# Floating Licenses 101

## MONTHLY & YEARLY LICENSES

### // WHAT IS A FLOATING LICENSE AND WHAT ARE THE BENEFITS?

We use an industry standard floating license. "Floating license" means that the licenses are not assigned to a specific station and can be used on ANY station in the organization. If an Operator purchases three monthly or yearly licenses for a specific title, any three stations can run that title at the same time.

### // WHAT IF I LAUNCH ON MORE STATIONS THAN I HAVE LICENSES FOR?

In the event that three stations are actively using that title and a fourth station launches it, the fourth station automatically rolls over to a "per minute" license and those minutes are tracked and billed according to what that title's per minute price is set to. See example below:

#### EXAMPLE

An Operator buys 3 monthly or yearly licenses for the title "VReally Fun Game."  
3 stations are actively using the title while it is launched on a fourth station.

STATION 1  
Floating License

STATION 2  
Floating License

STATION 3  
Floating License

STATION 4  
Per Minute

Because "VReally Fun Game" is being used on 4 stations at the same time with only 3 floating licenses purchased for it, the fourth is billed at the title's per minute price.
